

# QUALITY ASSURANCE ENGINEER

Job Description

**GREEDYGAME**

[www.greedygame.com](http://www.greedygame.com)

## ABOUT US:

GreedyGame is looking for a Quality Assurance Engineer to join its clan! We are looking to get a kick ass engineer on board who has the knack for finding the quirkiest bugs. You'll be working alongside other engineers and developers, collaborating on the various layers of the infrastructure for our platform.

## JOB DETAILS:

**Seniority Level:** Entry Level

**Industry:** Marketing & Advertising

**Employment Type:** Full-Time

**Job Functions:** Engineering, Information Technology

**Job Location:** Bengaluru

## WHAT ARE WE BUILDING?

GreedyGame is building mobile first advertising solutions. We are a platform which enables blending of ads within mobile apps and games so that they become a part of the content. This allows developers to monetise their apps and games without degrading the user experience. Check out [greedygame.com](http://greedygame.com) to know more!

## WHAT'S IN IT FOR YOU?

- Opportunity to be a part of the big disruption we are creating in the ad-tech space.
- Learn and grow at a free, open and fast paced environmentOffice in one of the most happening places in Bangalore.
- An amazing clan and the opportunity to be a part of it, free lunch on all days of the week, fully stocked pantry within 20 feet reach, a foosball table to burst stress and a great working environment.
- Continuous feedback system to ensure that improvement is a constant focus.

## WHAT WILL BE YOUR RESPONSIBILITIES?

- Work with our proprietary Java and Kotlin based SDK to find performance and functionality related issues.
- Working with in-house Dashboards to perform testing of UI and APIs.
- Collaborating with teams to create test documents.
- Planning and task management in congruence with the Leadership Team.

## WHAT ARE WE LOOKING FOR?

- Expertise on testing different QA Methodologies black box, white box and gray box for both web UIs and backends both manually and automation.
- Ability to code and maintain back-end automation frameworks written in distributed programming languages such as Python.
- Ability to automate Android applications using tools such as Appium.
- Hands-on experience on API testing and testing tools like Postman, Rest-Assured or other API testing tools.
- Experience working with Proxy tools like Charles Proxy, Fiddler.
- Excellent in test strategising, planning, estimation, execution, and reporting.
- Working knowledge of Agile scrum methodologies
- Strong debugging, problem-solving, interpersonal and troubleshooting skills.

## SKILLS AND ABILITIES:

- Python or Java
- Appium
- Rest-Assured or Postman
- Fiddler or Charles Proxy
- Black Box testing
- White Box testing
